

The high art of noble sound

Invisible Premium Sound Systems

LoftSonic premium
sound systems are
invisible and serve our
single purpose

To let all the technology be forgotten in the
undisturbed interior design and to immerse yourself
in a world of sound with a maximum of musical
enjoyment and emotions and to feel like you are in
the best seat at a concert.

Pure goosebumps. Highly emotional.

Experiences that touch
our soul

"Karl-Heinz Theis, CEO and developer"

The world of noble sound in LoftSonics
manufacturer showroom

We are experts in our field

Since the beginning, we have continued to perfect the technology of our invisible flat panel speakers. Our excellent know-how and the use of handpicked materials make LoftSonic the first address.

We are only satisfied when your project is perfect for you and us.

Out of passion and conviction

For us, LoftSonic is a passion. That's why it's so unique.

With more than two decades of experience in the development, manufacture and integration of invisible sound systems, we have reached our goal with LoftSonic.

Nothing sounds like a LoftSonic

Waldemar Schimanowski

Karl-Heinz Theis

The best or nothing

LoftSonic plays with absolutely natural and self-evident lightness, precision and subtlety, paired with a three-dimensional sound like on a stage, as known from going to concerts.

No matter what genre of music. Whether with very quiet tones, or in large signal behavior at the highest levels and maximum dynamics.

And that is exactly the difference that touches the soul and gives goosebumps.

LoftSonic is in a league of its own

LoftSonic functional principle

LoftSonic high-power speaker modules are vibrating soundscapes.

Extremely dynamic and precise electrical impulses set the sound surfaces into microscopically small vibrations, just like the body of an acoustic stringed instrument vibrates.

The all decisive technology breakthrough

Unlike other invisible flat panel loudspeakers, LoftSonic sound surfaces do not produce diffuse sound thanks to a new and sophisticated technology. On the contrary.

They depict extremely powerfully, directly and with impressive three-dimensionality.

LoftSonic loudspeaker modules are invisibly integrated into building materials, wooden materials, furniture, etc. by us, the manufacturer.

The precision drive

The extremely powerful system amplifiers are the precision drivers of the LoftSonic sound systems.

Exactly tuned, the DSP amplifiers match precisely with the high-power loudspeaker modules and ensure perfect control, with up to 6000 watts, for the absolute fun factor.

Compatible

The connection to almost all modern smart home (multiroom) audio systems is easily possible in existing buildings or when planning new homes or rooms. Or simply connect to the preamp of the existing stereo system.

The high art of noble sound, staged to perfection

We take a lot of time to show you our LoftSonic passion. Goosebumps included.

Promised!

Immerse yourself in a world of visual and acoustic aesthetics and let our "BEST OF" inspire you for your project.

Invisible integration in drywall construction

Invisible integration in a room acoustics system

Invisible integration in natural stone

Invisible integration in furniture

The LoftSonic manufacturer showroom offers you a unique and unforgettable experience

Maximum performance through maximum experience

As the manufacturer of LoftSonic, we know exactly what we have to do, to ensure that your sound system provides lots of fun, emotions and goosebumps in your rooms every day.

The course for this is set in the early planning phase.

Holistic planning guarantees the full performance of LoftSonic

Whether your small stereo setup or your large private cinema. Every system has our full attention and is meticulously planned.

We support our partners in all phases of implementation and thus guarantee complete success on the part of the manufacturer.

We take our time when putting the sound systems into operation. Just like the fine-tuning of a racing car on the race course, LoftSonic is optimally adjusted by us to the respective room.

According to your taste.

After all, it's only LoftSonic when everything is perfect for you and us.

Noble and immersive sound in the undisturbed interior design

LoftSonic creates a new era of the possible
